REthink plastics.
Respect **LIFE.**

Built For outdoor life.

Durable modular decking tiles
For outdoor living, camping, events
and professional use.

skaza
Since 1977

A second life.
A lasting purpose.

Made from 100% post-industrial recycled polypropylene and created to remain useful for years to come.

Instead of consuming new resources for a short-lived solution, we keep valuable material in circulation and give it a new, practical purpose.

Available in three colours: **Anthracite, Grey and Brown.**

One solution.
Endless possibilities.

A durable, modular solution designed to create a stable surface across changing terrain and weather.

Easy to install, adapt, move and clean.

- **Weather-resistant**
- **Non-slip**
- **Modular**
- **Tool-free installation**

Seasons change. The surface STAYS.

From warm summer days to cold, wet winters, Skaza Decking Tiles are designed to remain a reliable outdoor surface throughout the year.

Their durable polypropylene construction resists changing weather conditions, moisture and everyday wear - without requiring permanent installation.

A stable and practical foundation, whatever the season brings.

Confident steps.
Whatever the conditions.

The finely textured surface provides enhanced grip and more confident movement.

Its non-slip structure supports reliable footing in areas exposed to moisture, changing weather and frequent use.

A stable surface designed for safer and comfortable movement.

Built to Fit.
Ready to CHANGE.

The modular click-together system allows tiles to adapt to different spaces, layouts and applications.

Individual tiles connect quickly into anything from a narrow pathway to a larger functional surface—without tools or permanent groundwork.

Extend, reshape, move or reuse the surface whenever needs change.

Connect.

Click.

Done.

Light to handle. STRONG under load.

Despite their lightweight construction, Skaza Decking Tiles provide a stable and durable foundation for demanding everyday and professional applications.

The system is suitable for agricultural machinery, workshops, storage areas and other heavily used surfaces.

Up to 1,000 kg load capacity per tile.

ADVERTISING

This section presents a focused approach to building awareness and demand in France.

- **Craftspeople and DIY users**
  non-slip floor protection for workshops and working areas
- **Event and exhibition organisers**
  Fast-installation walkways and stable surfaces for booths and visitor areas
- **Pool, wellness and fitness operators**
  water-resistant flooring for frequently used activity areas
- **Homeowners and families**
  patios, garden furniture, play areas and sensitive surface protection
- **Gardeners and greenhouse owners**
  clean, stable paths across grass, soil and gravel
- **Farmers and agricultural users**
  practical surfaces around greenhouses, compost areas, stables and storage facilities
- **Campers and motorhome owners**
  portable outdoor flooring for campsites and temporary setups

Different people. Different needs.

One adaptable solution.

We create.
You GROW.

We provide you with powerful campaign assets that support your sales.

Stronger stories.
Greater visibility.

We provide you with video materials to bring awareness.

We create diverse and engaging video content to support your market—from authentic user-generated content and product demonstrations to AI-generated animations, lifestyle videos and ready-to-use social media campaign materials.

Designed to be SEEN. Built to SELL.

The optimised point-of-sale display turns the product into a hands-on retail experience.

Customers can see the available colours, feel the non-slip texture, test the click-together system and step onto the finished surface.

More visibility.
More interaction.
Greater sales potential.

TECHNICAL SPECIFICATIONS

- **Dimensions**
  25,1 × 25,1 × 2.62 cm
