Commitment to sustainability

1977 Skaza is a family-owned industrial company with nearly fifty years of tradition in developing plastic solutions for global multinationals. The knowledge, processes, and uncompromising quality required by the industry are the foundation upon which the trust of our partners worldwide has been built.

From this expertise, our own brand was born.

The Skaza brand is the purest expression of our creative passion. It is a space where industrial precision, technological perfection, and sustainable materials are transformed into thoughtful products that simplify people's lives – at home, in the garden, and in everyday moments.

Our brand is our clear commitment to the market: responsible choice of materials, award-winning designs, and practical value that reduces environmental impact while increasing significance for the individual.

At Skaza, we believe that the true power of technology is only realised when it is combined with human creativity. That is why our own brand grows at the intersection of knowledge, heart, and responsibility – towards people, partners, and nature.

Through the synergy of people, technology, and knowledge, Skaza remains one of the leading development suppliers in the European plastics industry.

56 markets

We are present in as many as 56 markets, which demonstrates our ability to provide high-quality solutions on a global scale.

We process more than 5000 tonnes of various granulates

2000 product variants

45 million finished products and 20 million semi-finished products

Durability

Pioneers in the use of recycled materials and the introduction of Industry 5.0 solutions, enabling our partners to reduce costs and increase competitiveness.

Our mission is to improve people's lives through responsible solutions, strengthen environmental responsibility, and build a better future.

Reliability

Our long-term collaborations with leading global companies show that we are a reliable partner who delivers on promises.

Our customers:

Innovation

We constantly invest in the development of new technologies to meet the needs of customers with whom we create added value.

Flexibility and partnership

We treat every customer individually, with the aim of achieving the best results for both parties.

Our strength is people

/A message from the owners

When they trust themselves, they are able to set boundaries, to boldly say “no” and to live authentically. They no longer seek validation in the opinions of others, but follow their own vision and heart.

Tanja Skaza

Digitalisation enables us measurability, while the heart provides meaning. Smart factories are not built by robots, but by people with an open heart and a clear goal.

Igor Skaza

At Skaza, we believe in people and in the process. Trust is not a feeling, but the result of consistent decisions and responsible actions over time. That is why we do not build relationships on promises, but on what we do every day.

Digitalisation gives us measurability and control. But it is people who give it meaning. Smart factories are not built by robots, but by people with a clear goal, knowledge, and responsibility for their work.

When people trust themselves and the process, a company can operate long-term, stably, and fairly towards partners, employees, and the environment. We build the future of Skaza on these relationships.

Awards and recognitions

2025

- Silver Award for Innovation, Celje Fair (MOS) – Skaza decking tiles
- Silver Award for Innovation, SAŠA region, Skaza decking tiles

2024

- Ethical Style Award, Ambiente – Bokashi Organko Essential
- Ambiente Solutions Award – Bokashi Organko Essential
- European Quality Trademark (EQTM) – Organko range

2023

- Finalist Plastic Recycling Awards Europe
- Bokashi Organko Essential

Red Dot Design Award

- 2019 – Bokashi Organko composter
- 2023 – Organko Daily, grey colour

/Awards

Our products have attracted significant international attention at prestigious global trade fairs, most notably **Ambiente, Maison & Objet, and Spoga Gafa**. Visitors and buyers there confirmed that our products are not only functional and environmentally friendly, but also thoughtfully designed, aesthetically perfected, and visually appealing. Due to the blend of innovation and the use of sustainable materials, Bokashi Organko Essential has received several important awards that strengthen its reputation in the global market. Among them, the **Ethical Style 2024** at the Ambiente fair, the **Ambiente Solutions Award 2024**, and the prestigious title of Plastic Recycling Awards Europe Finalist 2023, which rewards advanced solutions and the successful use of recycled materials, particularly stand out. In 2024, the entire Organko range reached another important milestone – it obtained the **EQTM (European Quality Trademark)** certificate, which confirms superior quality and compliance with high European standards of excellence. This recognition further confirms that Bokashi Organko Essential is manufactured to the highest standards and represents a significant step forward towards sustainable, responsible production.

Organko Daily

START AR:

ORGANKO Daily

Daily organic waste bin (3.3 L)

reddot winner 2023

BEST SELLER

Dimensions: **24×20.5×17 cm**

Material: **Post-industrial recycled plastic** (recycled polypropylene)

Weight: **300 g**

Volume: **3.3 L**

Parts: bin, lid, carrying handle

Colours: ● ● ● ● ●

A sustainable solution without plastic bags

Always at hand

Easy and hygienic organic waste management.

Sealing lid

Rounded and smooth surfaces allow for easy cleaning.

Replaces plastic bags

Convenient, space-saving size.

The perfect pair with composters

Creating nutrient-rich compost has never been so simple.

Slice it, chop it, add it to
Organko Daily. ↘

"ORGANKO Daily combines great design, quality material, and easy maintenance."

No unpleasant colours

Faster decomposition

Rich nutrients

Bokashi liquid

Nutritious fertiliser

Create natural fertiliser with Bokashi composting.

Fermented waste **decomposes faster** than with traditional composting.

Bokashi bran with microorganisms enables **waste fermentation**.

The concentrated liquid, rich in micronutrients, must be diluted with water in a ratio of 1:200 before use.

The liquid is ideal for **fertilising plants** and promoting their growth. It also serves as a **natural cleaner** for drains.

The composter creates a natural fertiliser rich in phosphorus, nitrogen, and potassium. Once you bury it in the soil, you will nourish your plants and create a high-quality harvest.

The Skaza family composters

Bokashi composting – a fast and efficient way to convert organic waste into high-quality natural fertiliser.

Bokashi fermentation

An anaerobic process of organic waste processing, where the mass does not rot, but ferments. This preserves the nutrients and stabilises the organic structure.

Advantages

- no rotting or decomposition of the mass
- no unpleasant colours
- preserved energy and nutritional value of waste
- faster conversion into fertile humus after being added to the soil

Result

A stabilised, nutrient-rich mass that activates microbiological life in the soil, improves moisture retention, and increases soil fertility in the long term.

Bokashi bran

The key ingredient for successful organic waste fermentation.

Advantages

- a mixture of effective microorganisms, water, sugar, and wheat bran, promotes the natural fermentation process
- prevents rotting and the development of unpleasant colours
- reduces nitrogen loss during decomposition supports the creation of a microbiologically rich compost base

Result

Fermented mass with a higher content of available nutrients (N, P, K), which stimulates microbiological activity in the soil, improves soil structure, and contributes to better plant growth and resilience.

Bokashi Organko 1

The pioneer of composting

Use it to create natural fertiliser from organic waste.

Dimensions: \varnothing 23.3x32.3 cm

Materials: **Post-industrial recycled plastic**
(recycled polypropylene)

Weight: **2100 g**

Volume: **9.6 L**

Parts: lid, presser, inner bin, outer bin, carrying handle, dosing cup, spigot.

Colours: ●

The pioneer of composting

Helping households create from organic waste for nearly two decades.

Natural fertiliser

Bokashi liquid is an effective natural fertiliser for plants and for unclogging drains.

Compost base

The fermented mass enriches the soil with nutrients.

Airtight lid

The airtight lid prevents the spread of colours and the appearance of flies.

Easy cleaning

All parts are suitable for washing in the dishwasher.

For the garden, balcony or home

Organko 2

ORGANKO 2 is an indoor composter that uses the Bokashi method to turn your organic waste into nutrient-rich compost.

Aesthetics and practicality for every kitchen counter

Dimensions: \varnothing 23.3x32.3 cm

Materials: **Post-industrial recycled plastic** (recycled polypropylene)

Weight: **2100 g**

Volume: **9.6 L**

Parts: lid, presser, inner bin, outer bin, carrying handle, dosing cup, spigot

Colours:

It creates natural fertilizer

Fermented mass with a higher content of available nutrients (N, P, K), which stimulates microbiological activity in the soil, improves soil structure, and contributes to better plant growth and resilience.

/Organko 2

Design perfection

Combining aesthetics and practicality, it is an award-winning design accessory for every kitchen counter.

High-quality compost base

The fermented mass enriches the soil with nutrients.

No unpleasant odours or flies

The airtight lid prevents the spread of odours.

Easy cleaning

Suitable for washing in the dishwasher.

Natural fertiliser

Bokashi liquid is an effective natural fertiliser for plants.

Composter with character

"Since I started using ORGANKO 2, the plants in the garden are visibly healthier, and the yield is of better quality."

Organko Essential

A refined solution for home composting

With it, users close the loop of organic waste management, transforming them into natural fertiliser.

In this way, organic waste becomes a resource that improves soil fertility, supports root system development, and contributes to better soil structure and moisture retention capacity.

Dimensions: **35.4×27.4×38.7 cm**

Materials: **Post-industrial recycled plastic** (recycled polypropylene)

Weight: **1510 g**

Volume: **15.3 L**

Packaging: Organko Essential with or without base, Organko Essential set with base

Colours: ● ● ● ● ●

High-quality compost base

The fermented mass becomes an excellent compost base that enriches your soil with nutrients.

First step to nature

/Organko Essential

Waste volume reduction:

Reduces the volume of organic waste by up to 25%, contributing to more efficient organic waste management.

No unpleasant colours and flies

The airtight lid prevents the spread of odours and the appearance of flies, allowing for indoor use.

“By using ORGANKO Essential, we have reduced kitchen waste while creating nutritious soil for our garden, which has yielded plenty of healthy vegetables and fruit.”

Easy cleaning

The composter is dishwasher safe, which facilitates maintenance and ensures hygiene.

Natural fertiliser

Diluted Bokashi liquid obtained during the process serves as an effective natural fertiliser for plants.

Sustainable choice

Made from recycled plastic.

Reencle

Electric composter

An electric kitchen composter that uses microorganisms to convert organic food waste into nutritious compost in less than 24 hours. A multi-stage filtration system prevents the spread of odours. Therefore, it is suitable for use in a modern living environment. Enables rapid processing of organic waste. The resulting compost is suitable for use in the garden, on the balcony, or for indoor plant care.

Dimensions: **30.5×33×46.7 cm**

Materials: **polypropylene PP (PFOA & PFOS) (BPA-free)**

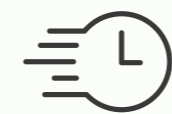

Weight: **10.2 kg**

Capacity: **up to 1 kg of waste daily**

Daily energy consumption: **1.25 kWh**

Noise level: **28 dB**

Colours: ● ●

Fast composting

During the process, the volume of organic waste is reduced by up to 90%. Composting takes place in a single cycle that lasts less than 24 hours.

90% less biological waste

Quiet operation

Noise level below 28 dB, suitable for indoor use.

Biolan composter 220eco

Biolan composter 220eco is designed for reliable year-round outdoor composting of organic waste. It is suitable for kitchen and garden organic waste, such as food scraps, grass, and leaves.

Dimensions: **115×80×80 cm**

Materials: polyethylene (insulated)

Weight: **26 kg**

Volume: **220 L**

Colours: ● ●

Performance

The ideal solution for everyone who wants to compost organic and garden waste year-round.

Faster composting process

A patented ventilation system supplies air to the centre of the compost mass, thereby accelerating decomposition. Less mixing, easier composting.

It features

- effective thermal insulation
- active process even in winter
- temperature and airflow control
- designed for stable outdoor use

Organko XL

For larger composting needs, such as hotels, restaurants, and schools, we offer ORGANKO XL with a 120-litre volume. Designed for composting large quantities of organic and garden waste.

Dimensions: **56×48×95.5 cm**

Materials: polyethylene

Weight: **12.5 kg**

Volume: **120 L**

Colours: ●

Performance

For outdoor use

Sustainable solution

Improves soil fertility

Bokashi method

Converts larger quantities of organic waste into soil nutrients

Cost savings

25% less organic waste, reduces waste collection costs

Gusta garden ↗

urban gardening

GUSTA GARDEN

SISSI STRAWBERRY

– vertical urban garden for strawberries

- For pesticide-free urban gardening.
- Ideal for the balcony, terrace or living room.
- Easy assembly, tool-free setup in minutes.
- Pest protection, as the planter design prevents fruit from touching the ground.
- Easy watering, water is evenly distributed through the tower from top to bottom.

- 📦 **Material:** high-quality, weather-resistant plastic
- 🎨 **Colour:** anthracite or white
- 🔧 **Content:** 4 levels + stable stand
- 🍷 **Capacity:** up to 9 plants
- 📏 **Volume:** approximately 10 L
- 📏 **Height:** 77 cm
- 🇪🇺 **Made:** in the EU (AT).

HERBS BUDDY

– fresh herb planter

- Built-in water reservoir that automatically takes care of watering the plants.
- Reduces water consumption and ensures a longer lifespan for your herbs.
- Its tilt function clearly indicates when it is time to water.
- Perfect for store-bought herbs such as basil, mint, or parsley.
- Suitable for the kitchen, window sill, or balcony.

- 📦 **Material:** high-quality plastic, food-safe.
- 🍷 **Reservoir:** integrated, with an even water delivery system.
- 🎨 **Colours:** honey, olive green, stone grey, ocean blue, white.
- ↔️ **Dimensions:** adapted to standard store-bought herb planters.
- 🇪🇺 **Made:** in the EU (AT).

CHARLY CHILI

– for those who love it spicy

- Designed for growing chilies, peppers, and other climbing plants that need stable support.
- With a built-in water reservoir, it ensures ideal growing conditions and a bountiful harvest.
- Perfectly fits balconies, terraces or outdoor gardens.

 **Material:** durable, high-quality UV-resistant plastic

 **Colours:** ocean blue, olive green, stone grey

 **Size:** standard

 **In the package:** 1 planter + 1 water reservoir + 1 plant support

 **Volume:** 10 L

 **Water reservoir:** 5 L, with a side opening for easy refilling

 **Suitable for:** 2 chili plants

 Made in the EU (AT).

BERRY BUDDY

– for a richer harvest of raspberries, blackberries, and currants.

- For pesticide-free urban gardening.
- Ideal for the balcony, terrace or urban garden.
- Easy assembly, tool-free setup in minutes.
- Pest protection, as the planter design prevents fruit from touching the ground.
- Easy watering, water is evenly distributed through the tower from top to bottom.

 **Material:** FSC-certified wood (EU) + recycled plastic

 **Construction:** 2 height-adjustable frames

 **Length:** 120 cm

 **Height:** 120 cm (above ground)

 **Width:** 34.5 cm

 **Stabilisation:** steel ground anchors

 **Made:** in the EU (AT).

ADDITIONALLY: BERRY BUDDY – extension kit

Allows for the expansion of the basic system and connecting multiple Berry Buddy structures into a line or corner system.

Additional specifications:

 **Length:** 120/240/360/480/600 cm

 **Height:** 120 cm (above ground)

 **Width:** 34.5 cm

TOM TOMATO

– tomato planter
with wicking system

- For growing tomatoes on the balcony, terrace or garden.
- Watering once a week, thanks to the integrated water reservoir.
- Stable growth support, aluminium poles that adjust to the plant's height.
- Suitable for balcony and terrace.
- Optimal volume ensures ideal nutrient supply to the soil.
- This ensures tomatoes grow steadily and yield abundantly until the last days of summer.

 **Material:** high-quality food-safe plastic, aluminium

 **In the package:** 1 planter + 1 water reservoir + 1 plant support

 **Volume:** 20 L

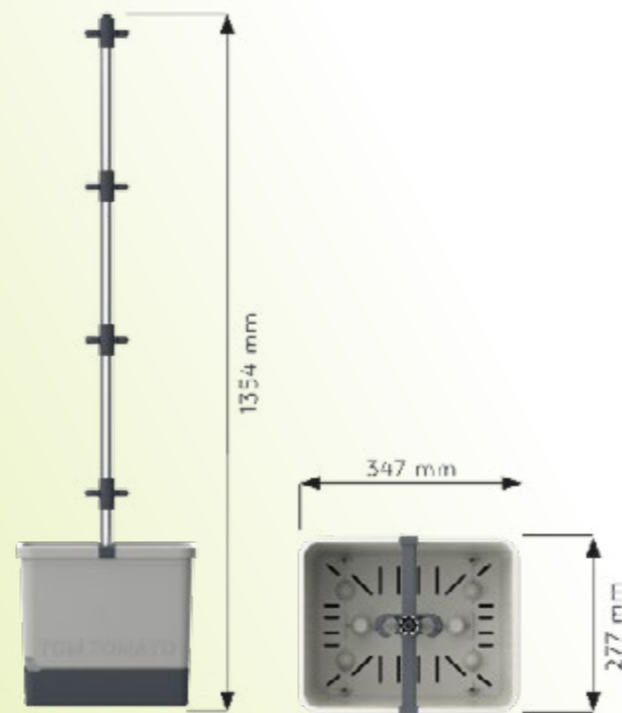

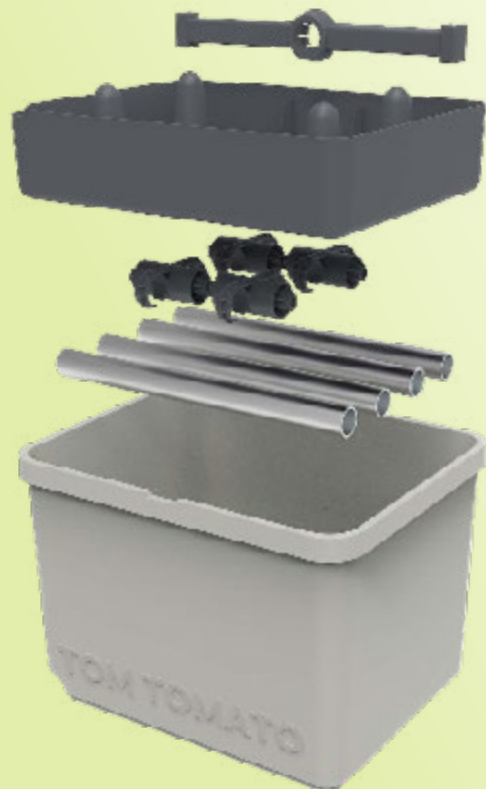

Water reservoir: 5 L, with a side filling opening

 **Suitable for:** 1 tomato plant

 **Made:** in the EU (AT).

GUSTA GARDEN

Decking tiles

Non-slip surface

Anti-slip surface ensures greater safety when walking or driving.

Modular flexibility

Allows for connection into various shapes and sizes.

Easy tool-free installation

Assemble as you wish or move elsewhere whenever you want.

Colours: ● ● ●

Material

100% post-industrial recycled polypropylene (PP)

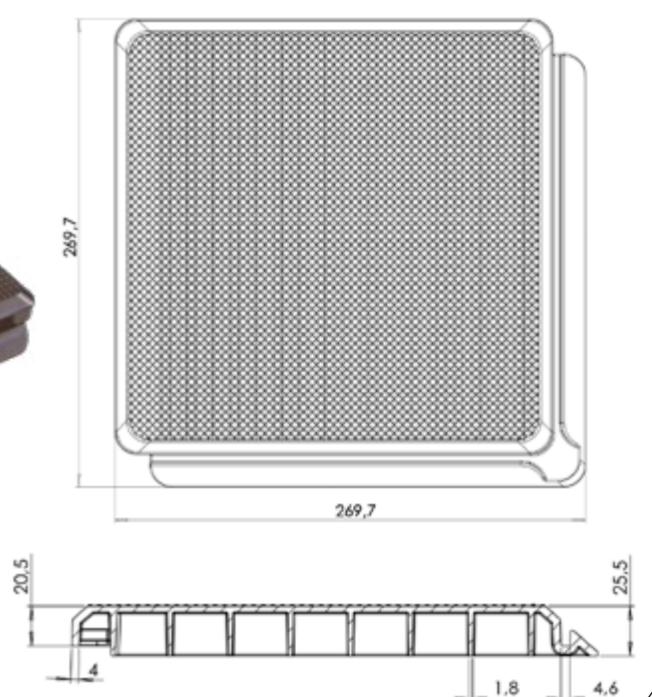

Load capacity up to 1,000 kg per tile

Weatherproof

Suitable for year-round use.

An effective surface for any terrain. ↗

—

Skaza decking tiles represent a stable and durable solution for arranging various terrains. They are designed for quick setup without the use of tools and allow for surface adjustment based on size, shape, or intended use.

Modular design allows for easy assembly, expansion, or relocation of tiles, making them suitable for both permanent and temporary surfaces. Due to their high load capacity, anti-slip surface, and weather resistance, they ensure safe use throughout the year.

7 CHAKRAS

**Choose the thoughts that serve you.
With them, you create your day.**

A unique collection of glasses with affirmations, designed for those who want more positive energy and inner peace in their everyday life.

PROPERTIES

The 7 CHAKRAS collection is based on the principle of mental priming – the brain reinforces what we are regularly exposed to. A repeating thought gradually becomes an internal mindset. Each glass is colour-coordinated with one of the seven chakras and carries an affirmation that acts as a daily focus. A visual symbol and a consciously chosen thought together create a simple ritual that supports a more stable and focused well-being. 7 CHAKRAS are a daily tool for training attention and strengthening positive mental habits

**A simple ritual.
A conscious choice. Every day.**

7 focuses

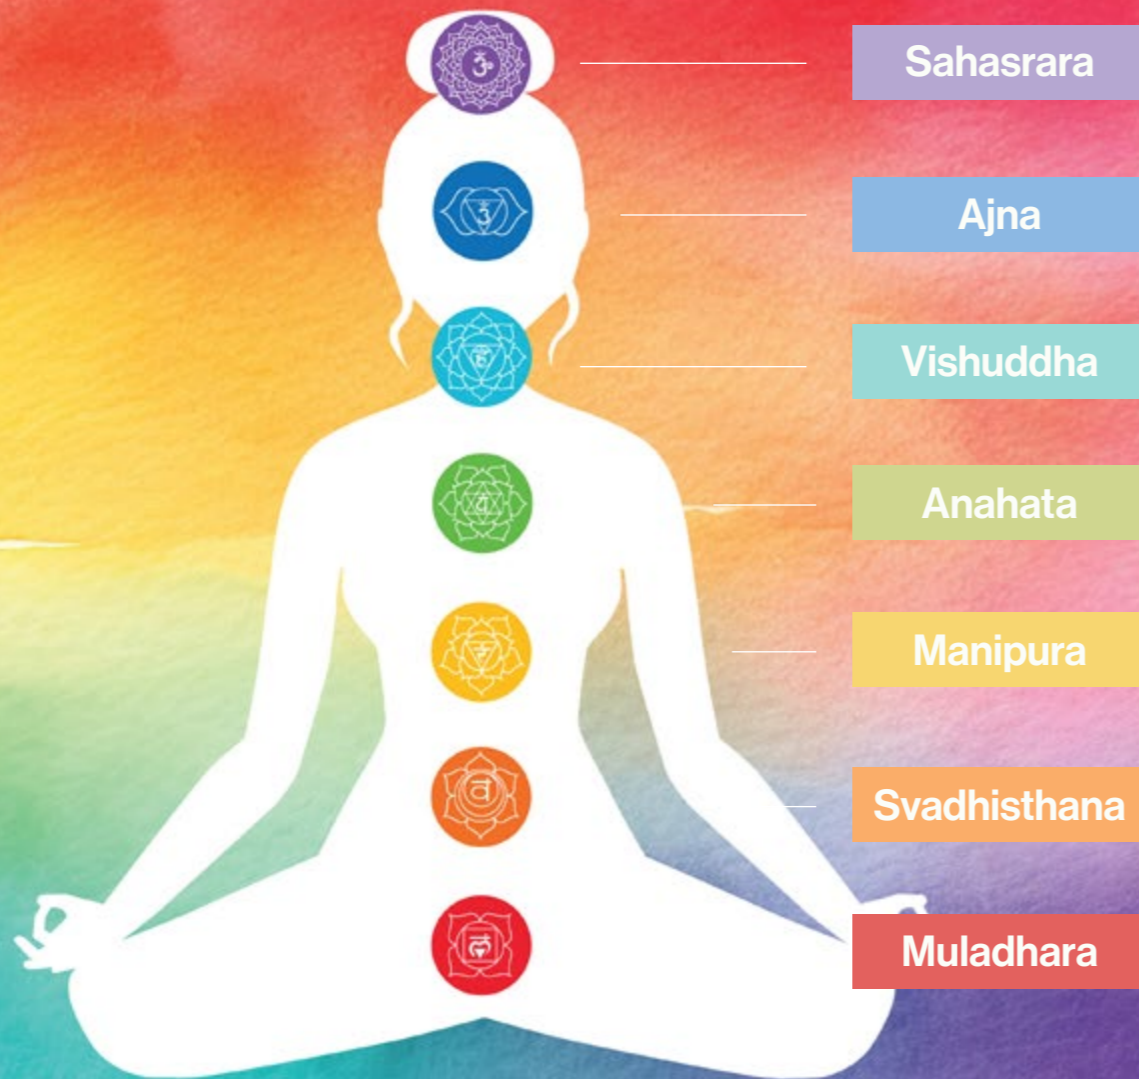

- Stability
- Creativity
- Personal power
- Love
- Expression
- Intuition
- Awareness

How to use them?

- Choose a glass based on the focus you want to strengthen.
- Read the affirmation and repeat it several times.
- The effect is based on repetition.

Seven chakras and their affirmations:

Crown chakra

(Sahasrara) – PURPLE

I connect with the universe and follow my purpose.

Third eye

(Ajna) – BLUE

My intuition leads me to clarity and wisdom.

Throat chakra

(Vishuddha) – TURQUOISE

I speak my truth clearly and respectfully.

Heart chakra

(Anahata) – GREEN

The love within me connects everything.

Solar plexus

(Manipura) – YELLOW

I trust in myself and my inner power.

Sacral chakra

(Svadhithana) – ORANGE

I express my creativity and enjoy life.

Root chakra

(Muladhara) – RED

I feel safe, stable and protected.

Harmony to sustainability

white.black. green range

How to use them?
Choose a cup based on the feeling you want to strengthen.

Three colours with a purpose
White, black and green carry clear symbolism and a message of balance, peace and inner strength.

A conscious daily ritual
As you drink, repeat the affirmation in your mind. Thus, every sip becomes your ritual of clarity and balance.

Laser-engraved affirmations
Durable engraving that does not fade when washed in the dishwasher.

Sustainable materials
Made of bio-based material from sugarcane.

Easy maintenance
Suitable for washing in the dishwasher up to 55 °C.

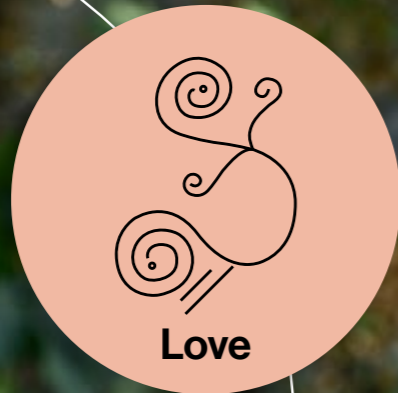

Harmony ↗ of contrasts

Colours and messages

COLOUR	MESSAGE
○ WHITE	In clarity of thought, I find peace and trust.
● BLACK	In the silence of inner strength I find myself.
● GREEN	Kindness connects and heals me.

Skaza Cup Creator Love

Two colour energies

-  **PINK** - gentleness, acceptance
-  **RED** - strength, presence

Love ↗
is power.

Why love?

Everything you create – relationships, projects, decisions – stems from your inner state. If you react from tension, you create tension. If you react from ego, you create resistance. If you react from fear, you create distance. Love is a conscious choice of response.

How to strengthen love?

Choose an intention, for example:
Today I listen before I react.
Today I choose respect.
Today I set boundaries.
Repeat it while drinking.
This is training that strengthens your intention.
Love begins within you.
And the world always responds to it.

What does choosing love bring?

Focus under pressure.
Healthier and more stable relationships.
Clearer, more thoughtful decisions.
Fewer internal conflicts, more inner peace.

Laser-engraved affirmations

Durable engraving that does not fade when washed in the dishwasher.

Sustainable materials

Made of bio-based material from sugarcane.

Easy maintenance

Suitable for washing in the dishwasher up to 55 °C.

CONTESSA

Elegant design

Replaces single-use plastic

Dishwasher safe

Bio-based materials

Elegance for outdoor moments.

Bowls, glasses and cutlery for carefree use even outside traditional living spaces.

VIVA linija

Sustainable alternative to single-use plastic

With a wide selection of glasses and tableware, the VIVA range complements the table for everyday meals, gatherings and special occasions. Its lightness, durability and simple design allow for carefree use at home and outdoors.

Reusable

Say goodbye to single-use plastic.

Durability

Impact-resistant and suitable for the dishwasher.

Durability

Bio-based material (sugarcane).

Recyclability

100% recyclable products.

SOLO

Functional aesthetics for cooking

The SOLO range includes carefully designed kitchen utensils, such as ladles, spatulas and strainers, designed for everyday use. The ergonomic design allows for comfortable handling, while thoughtful materials ensure a long lifespan and reliable performance in the kitchen.

Reusable

Durability

Dishwasher safe for carefree maintenance.

Durability

Made from bio-based materials.

Recyclability

100% recyclable products.

PICK&GO

Everything for a meal on the go in one set

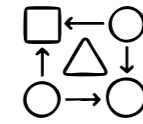

The Skaza Pick&Go set is a stackable container for picnics, camping and outdoor meals. The set contains 4 glasses, 4 plates and 4 sets of utensils, a multifunctional colander, a stand for stable placement of glasses and a container with a sealing lid. An eco cotton strap is included, allowing you to take it anywhere.

Convenience

Compact design for easy carrying.

All in one product

Serving, storage and carrying in one set.

Modular flexibility

Smartly designed set for easy use and meal organisation.

Easy cleaning

Durable material, dishwasher safe.

Stemware

The end of single-use plastic

The glasses are made of high-quality Tritan, a BPA-free material that is food-safe and allows for long-term use.

For enjoying moments – without single-use plastic.

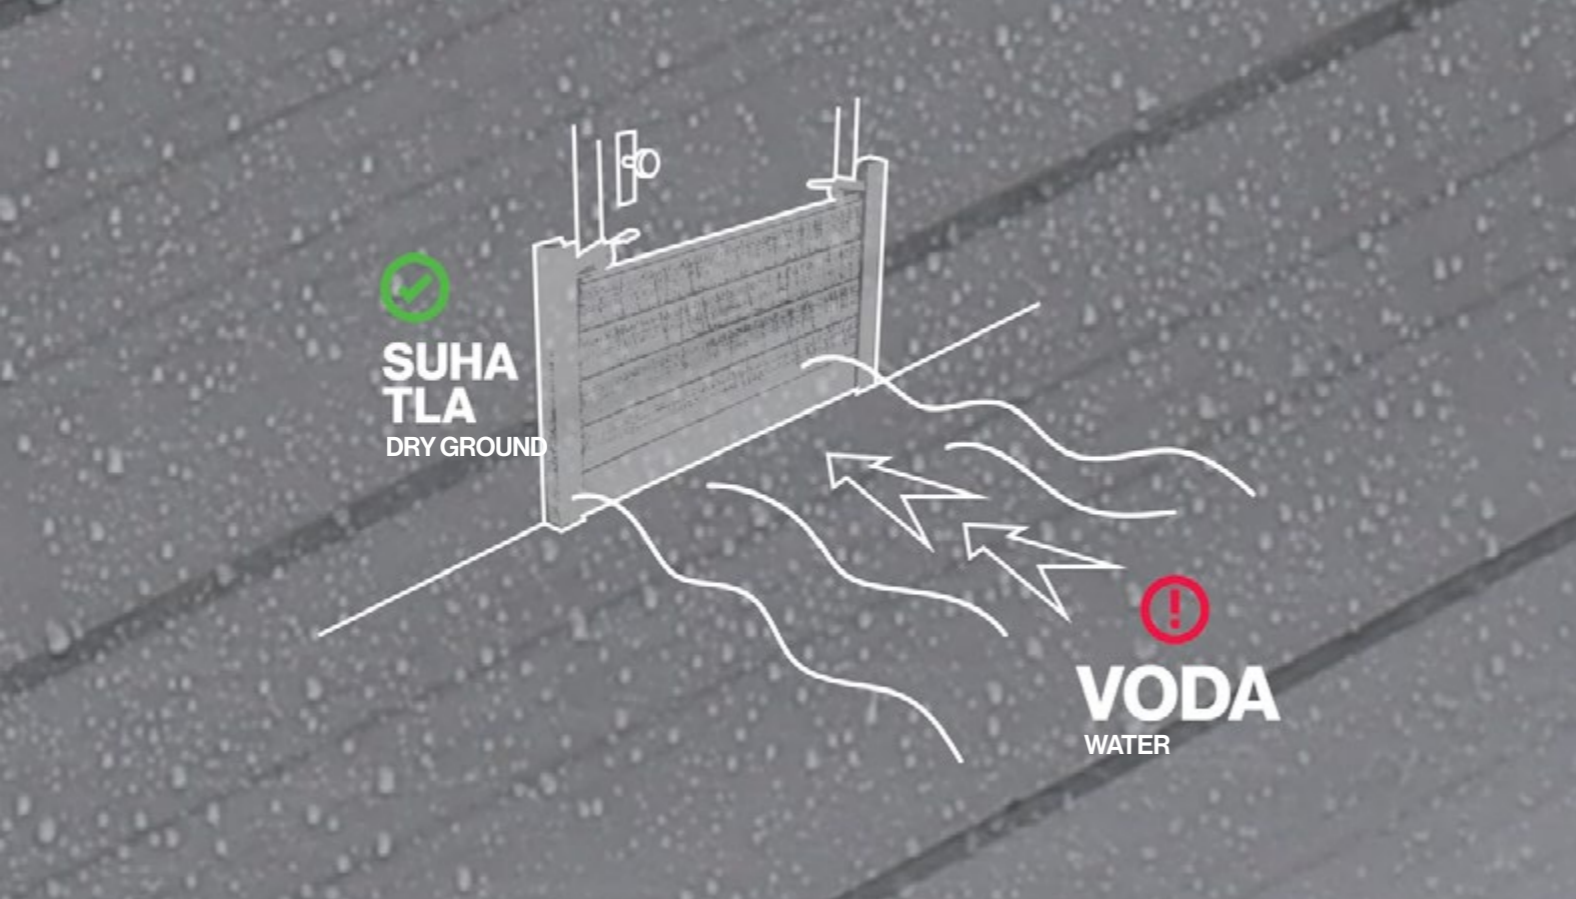

Elegance that doesn't break. ↗

KEY BENEFITS

- Tritan stemware offers the look of glass without the worry of breakage
- Perfect for home parties, picnics or elegant outdoor events
- Suitable for wine, champagne or cocktails
- Dishwasher safe

TECHNICAL INFORMATION

- 5× horizontal rails (120 cm)
- 2× vertical rails (65 cm)
- 2× tensioners
- Material: PVC
- Seals: foam, replaceable
- Maximum opening width: up to 100 cm (measured between soffits)

Flood ↗ protection

Severe storms and sudden rainfall have become our new reality.

When water overflows in a matter of minutes, every second counts, and so does every solution that can prevent it from entering your home.

It is made of high-quality PVC that does not rust, does not break, and remains durable even after years of use.

Advantages of use

Practicality

Installation is quick and easy – it can be done by a single person.

Reliability

Foam seals effectively stop water and sludge.

Aesthetics

The elegant anthracite colour matches modern facades.

Durability

Replaceable parts and a long lifespan.

Practical solution for

- main and side entrances of residential houses,
- entrances to commercial and industrial buildings,
- and other openings where water or mud ingress causes damage.

Two-component surface-mounted junction box

The two-component surface-mounted junction box is designed for use in the electrical installation segment. Due to two-component injection moulding, it is suitable for use in environments where a watertightness level of up to IP56 is required.

The company's sustainability commitments were taken into account during development, which is why recycled materials (rPS) were used, reducing environmental impact while strengthening the competitive advantage of sustainably designed solutions.

Faster installation time

The cable is simply pushed through the rubber openings without the need to cut grommets – allowing for faster and more efficient installation.

IP56 sealing rating

High protection against dust and water, ensuring long-term reliability and protection in demanding conditions.

Preventive wall offset profile

The design with a 2 mm offset reduces moisture build-up and increases the durability and lifespan of the surface-mounted box and the installations within it.

Openings on the back

The special design allows for easy installation of cables coming directly from the wall, contributing to a faster and simpler installation.

Greater box depth (50 mm)

It allows for easier maintenance, simple installation, and hassle-free servicing with easy access to internal components.

Carbon footprint reduction

Due to the use of recycled materials, the carbon footprint is reduced by approximately 50%, contributing to sustainable construction.

DIGITAL PRODUCT PASSPORT (DPP)

Enables product traceability throughout the entire life cycle – from the origin of materials to recycling. Scanning the QR code gives customers access to detailed information, increasing brand trust and supply chain security.

Transparency

Customers are given information that builds their confidence in the product.

Traceability

It facilitates stock management and returns.

Compliance

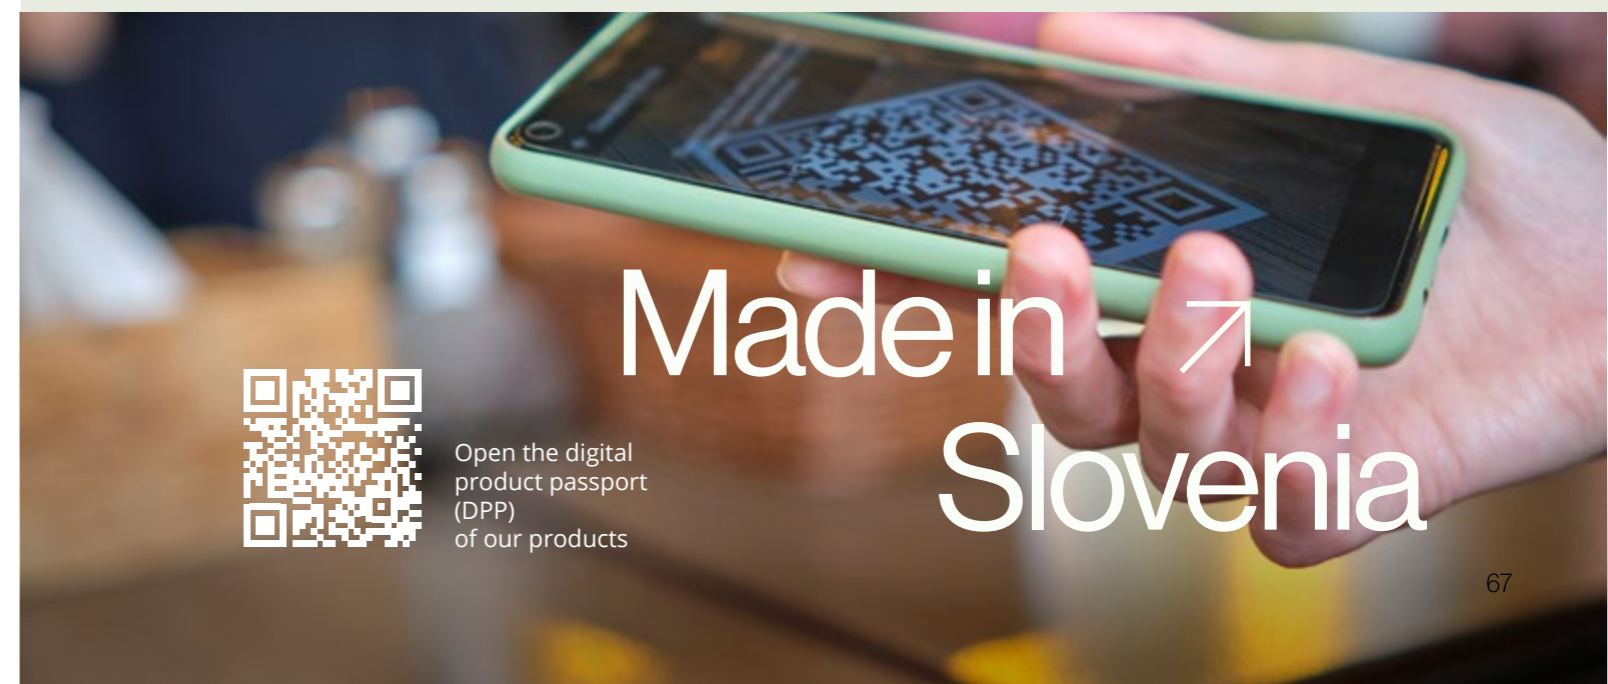

It helps meet environmental requirements.

Durability

It allows better management of resources.

A digital passport includes:

- Certified product information, including carbon footprint and sourcing of materials.
- Security protection, accessible only to authorised users.
- Interoperability for data exchange between different systems.

An effective surface
for any terrain. ↗
